Dunn named to NCARB , p2.....Architect Finder upgrade, p4-5....Golf tourney results, p8

COLUMNS

The newsletter of the American Institute of Architects, Arkansas Chapter Fall 2007

From the President
Galen Hunter, AIA

CE draws 'em in, inspiration keeps 'em coming back

Perhaps the biggest boost AIA ever got in regards to membership and participation in meetings and events was when the requirements for architectural licensure were changed to include the requirement for continuing education on a yearly (or bi-annual depending on the state) basis.

Suddenly all architects were looking for avenues to fulfill the requirements necessary to maintain their licenses and livelihood.

It didn't take long for AIA to figure out that providing the mechanism to fulfill these requirements might just be the ticket for increasing membership and

NWA hosts '07 state convention

Chapter issues Design Awards

Architects from across the state convened in Rogers Oct. 24-27 for the 2007 AIA Arkansas State Convention and Design Awards.

The event was hosted by the John Q. Hammons Center and Embassy Suites Northwest Arkansas, and more than 600 members of the architectural design community attended.

The 2007 Member Choice Award went to Polk Stanley for the Acxiom Central Arkansas Data Center (above).

Honor and Merit awards were presented to Arkansas architects for their work throughout the past year.

The 2007 Member Choice Award went to Polk Stanley Rowland Curzon Porter Architects of Little Rock for the Acxiom Central Arkansas Data Center in Little Rock [see photo]. The project also earned the firm an Honor Award. Members of the design team are Reese Rowland, AIA, Joe Stanley, AIA, Jim Thatcher, Jane

In the News

Dunn named to NCARB board

Blakely C. Dunn, AIA, of El Dorado, was installed as the director of Region 3 (Southern Conference) on the National Council of Architectural Registration Boards' (NCARB) Board of Directors during its 2007 Annual Meeting and Conference in Denver in June.

Dunn is president of CADM Architecture, Inc.

Husband-wife team earn award

Jonathan Opitz of Williams and Dean Architects and Patty Opitz of Polk Stanley Rowland Curzon Porter Architects, Ltd. Won the recent Emerging Green Builders Design Competition, which is sponsored by the U.S. Green Building Council, Arkansas Chapter.

The Opitz team submitted a plan for the Woodglen Solar Subdivision model house which, "blends old southern sensibilities with new materials for technology to create spaces that embrace nature esthetically and mechanically."

Insurance coverage goes green

The Fireman's Fund Insurance Co. is offering the first-ever insurance products designed to encourage and promote green building.

The new types of coverage are for commercial structures and include:

- l Certified Green Building Coverage – Designed for buildings that have achieved Green Globes or LEED certification, this coverage includes a 5 percent credit for "green" features.
- l Green Upgrade Coverage — This coverage allows non-green buildings and personal property items to be replaced with green alternatives following a loss. If the entire building is destroyed, it will be rebuilt to Green Globes or LEED standards.
- Building Commissioning Coverage – Following a loss to a building system (i.e. HVAC, lighting, plumbing or safety), this coverage provides for an engineer to commission the repaired or replaced system.

Fowler completes inaugural Leadership Arkansas class

Daniel K. Fowler, AIA, recently completed the inaugural Leadership Arkansas class created by the Arkansas State Chamber of Commerce.

The first Leadership Arkansas commencement included 62 graduates from across the state. Leadership Arkansas is a program designed to take a statewide view of the economic and political challenges that face Arkansas. The program offers leadership opportunities that expand the impact of community leaders across the state.

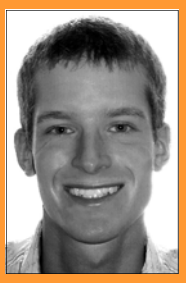
Applications are now being accepted for the next class. For further information, or to apply, contact Susie Marks at 501-210-4206 or email her at smarks@arkansasstatechamber.com.

Taylor joins Wilcox Group

The Wilcox Group Architects of Little Rock announces the addition of J. Richard Taylor, AIA, as Director of Construction Administration.

Taylor, a registered architect, has more than 34 years of construction administration experience on such prestigious projects as the Arkansas Governor's Mansion, Arkansas Children's Hospital and the U.S. Postal Service. Previously, Taylor was in charge of construction administration at the former Gaskin, Hill, Norcross firm.

Mueller joins Polk Stanley in NWA



Heiko Mueller has joined the Fayetteville office of Polk Stanley Rowland Curzon Porter Architects, Ltd.

Originally from Ehweiler, Germany, Mueller earned his Bachelor of Architecture degree from the University of Arkansas in Fayetteville in 2002 and went on to complete internships with Jennings and McKee Architects and Robert Sharp Architect, Inc, both of Fayetteville. Mueller is the son of Joe and Gabriele Robinson of Cedarville (Crawford County).

Message from the president

CONTINUED FROM P1

filling seats at it's lightly attended functions. Up until continuing education became an issue, participation in AIA events was the province of those individuals and firms who saw architecture as something more than just another profession – it was a calling that affected society far beyond the construction of buildings. A yearly convention for the entire state chapter could be held at any hotel that had a ballroom that would handle a hundred people.

Fast forward to 2007, and the AIA Arkansas State Convention has grown to the point where very few locales in the state have the capacity to accommodate the more than 600 persons signed up to attend this year's convention. This year's event marked our first visit to the city of Rogers. It was a great event in a wonderful new facility. An outstanding lineup of speakers and opportunities to learn and network were on this year's agenda.

The convention committee has spent a lot of time analyzing the feedback that was received from last year's convention and made changes accordingly to provide something that should appeal to everyone. Of course, there will always be complaints. Either there will not be enough technical seminars to suit some, or maybe the keynote speaker is not relevant to all types or sizes of firms practicing in the state. Some members opted not to attend this year's convention because they can get enough credits to maintain their license without spending the cash to participate.

There are essentially three ways to view participation in the AIA and the convention in particular.

One is cynically – it is a chance to fulfill the continuing-education requirements in the shortest and most pain-free manner so that one doesn't have to attend any other seminars or presentations the rest of the year. It's the "12 credits and I'm out of here" approach.

Another is graciously – the convention is a chance to take care of those nagging CE requirements, and there is also the chance that one may come away inspired or learn some technical information about new systems or materials that could be incorporated into future work. It may not all be my cup of tea, but it's that once a year kick-in-the-pants that reminds me why I chose architecture as a profession in the first place.

And the third, of course, is enthusiastically. This is the best opportunity to learn what is new with the profession. It is a chance to network with colleagues and exchange ideas. It is a chance to be inspired and a chance to celebrate the best of what our profession has achieved in the past year. And, oh yeah, the CEU's are just an added bonus.

Everyone has his own reason for attending, or not attending, the convention or participating in the activities of AIA. So if an architect participates in an AIA activity only once a year, it is still worth it. Maybe they will come away a little smarter or a little more inspired to become a positive force in their own community.

If that happens, it is mission accomplished.

Galen Hunter
President, AIA Arkansas

New Discovery Channel show needs architects' feedback

Dear AIA Arkansas members:

My name is Alissa Carlton, and I'm working on a new program for the Discovery Channel. We are looking for people from a wide variety of career fields who would be interested in being a host on the new show,"Hidden Cities."

The members of AIA could be perfect for what we need.

We're looking for anyone who is involved in the field of infrastructure, architects, civil engineers, contractors or urban planners, etc. We would also like to meet any professors, teachers or people who are simply passionate about these topics. We don't need an expert in every area, just someone who loves what they do.

We want to meet all types of people -- any age, race, ethnicity, or gender.

"Hidden Cities" will explore the vast and often invisible machinery that allows modern metropolises to function like clockwork. From how water makes its way to your tap, to how commuter systems work — it will all be covered.

I'm hoping you can forward my email address to anyone who might be interested in this cool new show. Perhaps you have an e-mail list you could let know about us? I'm certain that members of AIA are just what we're looking for, and I would truly appreciate any help spreading the word about our search.

Thanks for your time.

Best,
Alissa

Architect Finder feature upgraded on AIA website

Dear AIA Arkansas members:

Greetings. This fall, AIA national will upgrade its Architect Finder feature on www.aia.org and finally shut down the current, very cumbersome route members must take to be included in search results.

The new system ties directly to firm records in TIMSS to deliver core firm information, then allows members to add considerable detail about their firms' make up and capabilities, such as services provided, building-type specializations, firm-principal names, number of employees, locations where licensed, and project portfolios with images. Before we ask members to build their listings, we'd like to make sure we have the very best firm data on file.

That's where you come in. Members of the CACE Public Affairs Resources Network and others have already worked with us to develop a system and work with this tool, and for that, we thank them. You can find two documents in this issue of the newsletter [see p5]. One outlines the structure and features the new Architect Finder, and the second provides guidance on reviewing your own firm records to help us bring them up to date. You can either make the fixes yourselves or forward them to national for input.

We will be reaching out in addition to 1) members who do not show an associated firm in their record, and 2) firms that do not have a contact listed in TIMSS, which is critical to having their information show up in searches. Your component may receive questions about this, so sharing this information is encouraged.

Thank you in advance for helping us provide a new level of member value.

Terence Poltrack
Managing Director, Communications
The American Institute of Architects
1735 New York Avenue, NW

AIA Architect Finder

Access

The site is public at this IP address:
http://216.33.126.244
When ready for launch, the site will be public at this URL:
http://architectfinder.aia.org

The public search interface is open to the public and requires no log-in.
Firms may log in to update their firm profiles, build project portfolios, and learn site usage statistics. Log-in is through the SSO (Single Sign-On) log-in of the individual listed in TIMSS as CONTACT for the firm's COMPANY record. Currently, any RG member who is linked as an employee to a COMPANY record may *also* log in to update the firm profile. This may change in the future.
Components may log-in to display/undisplay firms, view core data changes requested by members, clear out pending firm changes, download firm data, and learn site usage statistics. Log in is through the SSO login of the individual listed in TIMSS as CONTACT for the chapter's GROUP record. This is maintained by AIA National Membership, and is generally the primary Membership Contact for the Component. Please contact Carl Sandstrom (CSandstrom@aia.org / 202.626.7512) with log-in questions or for assistance logging in as a Chapter User. Others may be easily be given access upon request.

Data Sources

Two separate sets of data are combined to make up a Firm Profile.
Core Data is COMPANY data held in TIMSS and refreshed nightly to the Architect Finder. Firms can use the online update feature to *submit changes* to this data, but they *cannot edit it directly* in TIMSS. Changes submitted by the Firm must be edited by AIA National or Component staff in TIMSS. These data fields are:

CUSTOMER (Company ID); MAIL_NAME (Company Name); COMPANY SORT; ALIAS; Address; City/State/ZIP; Country; COPHON; FAX; WEB; EMAIL; State Component (SEC LEVEL 1); Local Component (SEC LEVEL 2); CLASS (Company Type); CONTACT (Contact ID)

Firm Profile and Project Portfolio Data is entered and maintained only in the Architect Finder, by the Firm Contact, and is not found in TIMSS. It is *linked* to a Firm by the Company ID number.

TIMSS data requirements for COMPANY record to be included in the Architect Finder

Data is refreshed nightly from TIMSS to the Architect Finder web interface. For a COMPANY's core data to be pulled from TIMSS, ***all seven*** of the following data conditions must be met in TIMSS (see figures 1 & 2):

1. Record Type = C (Company)
2. Record Status = Active
3. Class = one of the following ARCHFM (Architecture Firm) ARCHSP (Sole Practitioner) ARMLTL (Multi-disc Design, Architecture Lead) ARMLTN (Multi-disc Design, non-Architecture Lead) DESGNB (Design Build)
4. Contact = must be present (not empty). This is the person who is able to login and manage the Firm's data at http://firmfinder.aia.org . NOTE: We are currently pulling data from TIMSS even if this field is empty, because many eligible firms lack this data and we want the firms to be able to edit their records anyway, which linked employee members will be able to do. *But the firm listing is marked "Do not display" in the Architect Finder, and will not show up in public a search if the member searches for their firm.*
5. Suppress From Directory = not checked. If this is checked, the Firm will not display online. This is what Components should use to suppress a member's firm if the want to exercise this level of control. If this field is checked in TIMSS, the firm/member *will not* be able to log in and edit or even see their profile.
6. Primary Address must exist and have Status = GOOD. This is the main address for the firm that shows up in the Architect Finder.

Must have at least one linked EMPLOYEE who is ***both***: a) member in good standing, and b) a registered architect, including International Assoc. members (member status RG *or* AS-INTL). If the only linked employees are EM, HS, AL, or AS members, the company data is *not* included in Architect Finder.

Additional Data Notes

- The main company phone number should be Type = COPHON. (fig. 3)
- Do *not* include "http://" when entering the Firm WEB address. (fig. 3)
- The Publish flag must be checked for data to be included. (fig. 3)
- Security Level 1 & Security Level 2 are currently what link the firm to a State/Local Component. (fig. 4). We are exploring other options for this, because we realize that many company records are not properly identified in this way in TIMSS.
- COMP SORT on the Primary Address screen dictates the alphabetical sort order for the firm in a search result set. (fig. 5)

Other forms or alternate spellings for a Firm's name should be entered on the Alias tab (DEM001 screen). Every alias entered here is included in the Architect Finder. The "P" flag is irrelevant. (fig. 6)

If you feel a firm is missing that should be online in the Architect Finder, please first check TIMSS to make sure all requirements above are met. If you still cannot figure out why a firm is missing, contact Carl Sandstrom at 202.626.7512.

New LR firm to focus on healthcare

James Robert Gresham and A. Allen Beggs have established Gresham & Beggs Architects, PA, of Little Rock.

The new firm will initially serve two states where it is currently licensed, Arkansas and Alabama . While the firm offers expertise in many areas of architectural design, including commercial, institutional, and educational projects, the group's primary focus will be healthcare projects such as nursing homes, assisted-living centers, hospitals and medical offices.

Gresham & Beggs offers 50 years of combined experience to its clients. Both Gresham and Beggs were with Fletcher Firm Architects for 20 years, where they worked with healthcare clients such as Beverly Enterprises.

Recent projects while at the Fletcher Firm include Chenal Heights Nursing Center and Foxridge at Chenal in Little Rock, Northwest Health Care Center of Washington,D.C., Beverly Healthcare of Crestview, Fla., and Golden Living Center in Gallatin, Tenn.

Congratulations Newly Licensed Architects

Christopher M. Baribeau, AIA, Fayetteville
Katie Anne Breshears, AIA, Rogers
David Paul Burris, AIA, Rogers
Charles Christmas Burrow, AIA, Benton
John Breck Childers, AIA, Fort Smith
Laura M. Chioldi, AIA, Fayetteville
John Reginald Clark, AIA, Little Rock
Joshua Danish, AIA, Fayetteville
Christopher Ryan East, AIA, Little Rock
Gerald Russell Fason, AIA, Little Rock
Matthew D. Galbraith AIA, Little Rock
Randall N. Palculict, AIA, Little Rock
Cynthia Ann Pruitt, AIA, Little Rock
Debra Roberts, AIA, Little Rock
Mark E. Upton, AIA, Fayetteville
Aaron Joseph Wenger, AIA, Little Rock
Jennifer Yael West, AIA, North Little Rock

New Water Systems moves to bigger location in south LR

New Water Systems in Arkansas has moved to a new location, with a new shipping and mailing address as well as new phone and fax numbers. Effective immediately the new contact information is:

New Water Systems, PLLC
[shipping]
10800 Arch Street Pike
Little Rock, AR 72206
[mailing]
P.O. Box 193805
Little Rock, AR 72219
PH: 501.888.0500
FAX: 501.888.0501

Cell-phone numbers will remain the same. The new location includes more room to grow personnel and enough warehouse space to stock the materials needed by local architects.

Technical support available for IECC

Many Arkansas design professionals may be working on projects in states that have adopted the 2006 International Energy Conservation Code® (IECC) or on projects for which the building owner wishes to meet or exceed the 2006 IECC standards.

The U.S. DOE Building Energy Codes Program (BECP) offers technical support to assist in understanding compliance with this code.

Compliance for the 2006 IECC

To help the energy-codes community (and design professionals) understand the requirements of the new 2006 IECC, BECP offers many resources through its website, www.energycodes.gov, including software, webcasts, training, and articles.

Ask an Expert

Every month, the program's Technical Support team responds to over 300 code-compliance inquiries from builders, architects, engineers, and code officials from across the country.

BECP will provide a top commercial and top residential frequently-asked question and answer. Email questions about residential and commercial energy codes to BECP Tech Support at :techsupport@becp.pnl.gov; or submit an inquiry at www.energycodes.gov/support/helpdesk.php.

WLR office seeks intern

Williams & Dean Associated Architects, Inc., a 31-year-old firm located in west Little Rock, is seeking an Architectural Intern, preferably a recent architectural graduate or an intern with one to two years experience. PowerCAD experience is a plus, but not required. Williams & Dean offers a competitive compensation and benefits package. All responses will be kept confidential. If interested, please fax resumes to 501.224.0873 or email to hstephens@williamsdean.com.

Hot Springs firm looking

French Architects is looking for a registered or intern architect. Contact David French, French Architects, PA, 827-B Central Ave., Hot Springs 71901, 501.623.6604, david@frenchcharchitects.net.

Project designers, managers needed

Laguarda.Low Architects LLC, an award-winning design firm that specializes in large-scale commercial projects that are located internationally, is seeking self-motivated, talented interns and graduate architects to join our growing team in Dallas, Texas. The ideal Project Manager or Project Designer candidate will hold a Bachelor's or Masters in Architecture and have five to 10 years of diverse architectural experience along with excellent verbal, written and visual communication and negotiation skills. An Architecture license is a plus. Qualified candidates can expect to travel.

For immediate consideration, please contact Christopher Laack or Shelley Wilson at 214.752.9008. Resumes and work samples may be emailed in PDF format to: Christopher.laack@laguardalow.com or shelley.wilson@laguardalow.com.

AAA guide can help with construction-contract disputes

The American Arbitration Association has made available the AAA Guide to Drafting Alternative Dispute Resolution Clauses for Construction Contracts.

Developed in conjunction with the National Construction Dispute Resolution Committee (NCDRC), the guide is designed to assist construction professionals and their counsel to understand the flexibility that exists in the AAA's Construction Industry Arbitration Rules and Mediation Procedures.

To download a free copy of the guide, visit www.adr.org/constr_jun07/construct_guide.html. For more information on the guide or any AAA services, contact Rod Toben at 972.774.6923 or tobenr@adr.org.
