“BASICS OF THIN VENEER WALL SYSTEMS”

This is a one hour program registered with AIA/CES
Provider Number is G128 -Program Number is GGTB01 / 1 HSW Credit

PROVIDED BY GLEN-GERY CORPORATION

One of the new developments in construction is the increased use of thin veneer systems. Clay brick, Natural Stone and Manufactured Cast Stone are a perfect fit for these types of installations. We will discuss basic wall detailing and construction. There are multiple combinations of materials to use in a thin veneer wall. We will minimize the confusion and give you a clear and concise way to achieve a sound thin brick wall.

Topics to be covered include -

Manufacturing

We will look at the way in which thin veneer products are made and how this affects their use. Certain processes are better suited for different types of installations.

Installation

As mentioned previously, thin brick can be installed in a variety of ways. We will examine all options and give the positives and negatives with each.

Cost and Estimation

There is some misinformation on the actual cost of a thin brick wall. We will look at the special concerns related to thin brick and show you an accurate comparison with other walls to allow you and your owner to make an informed decision.

Life Cycle / Durability

There has been some concern with regards to the life cycle of these thin veneer walls. We will also discuss real world expectations for these systems.
