

Arkansas ASHRAE cordially invites you to attend our February program. Our speaker this month comes to us through ASHRAE's Distinguished Lecturer Program. This program will be presented in Central and Northwest Arkansas. See date, time and locations below.

CENTRAL ARKANSAS

Date: February 4, 2015
Time: 11:30am—1:00pm
Location: Camp Aldersgate
2000 Aldersgate Rd
Little Rock, AR 72205
Cost: \$20/ person
Meal Included

NWA ARKANSAS

Date: February 5, 2015
Time: 11:30am—1:00pm
Location: Mermaids
2217 N. College Ave
Fayetteville, AR 72703
Cost: \$20/ person
Meal Included

Program Topic: Green Maintenance Needed to Keep HVAC Systems Green

We are expending considerable effort to assure that today's HVAC systems operate efficiently, provide an optimal indoor environment, and support our overall goals of environmental responsibility and sustainability. This talk demonstrates the importance of a strong maintenance program to assuring that these "green" systems continue to provide the performance that was the design objective. This talk is filled with real world examples of both successful and lacking maintenance approaches and techniques. It illustrates both the cost and rewards associated with various levels of maintenance.

Speaker Biography

Bob Baker has over 35 years of experience in all facets of building operation and maintenance. He heads a consulting practice that advises building owners on HVAC operations and maintenance matters and provides legal support in HVAC and IAQ matters. BBJ Consulting Service includes a team of Engineers and technical experts in all phases of HVAC maintenance and indoor environmental quality.

Mr. Baker is an enthusiastic contributor to our industry through several organizations. He is past President of the Indoor Air Quality Association (IAQA). He is a member of the ASHRAE Technology Council, two Technical Committees, has written numerous papers, articles and is a regular ASHRAE presenter. He is chair of TC7.3 (Maintenance and Operations Management) and is the ASHRAE Representative to the Western HVAC Performance Alliance where he is Co-Chair of the Executive Committee. He previously chaired SSPC 180, the IICRC S 520 Standard Committee and served on the HVAC Hygiene Standards committees of both ACCA and NADCA. He has been awarded the ASHRAE Distinguished Service Award Exceptional Service Award and is an ASHRAE Fellow.

Mr. Baker's undergraduate degree is from Oklahoma State University with an MBA through the Gulf Oil program at Harvard University.
