Date	Time	Location
2nd Thursday	6pm - 7:30 pm	NW/Central Sections In-Person or Virtual
*Date and Time Subject to change, in-person locations will vary		

2025 Study Topic Schedule

January	Intro to Technical Disciplines - Set the foundation for the year, focusing on technical content in PPD, PDD, and CE.
February	Structural Systems – Understand fundamental structural concepts relevant to architectural design.
March	Structural Systems – Understand structural applications and building code requirements.
April	MEP - Cover HVAC (heating, ventilation, air conditioning) basics.
May	MEP - Dive into electrical and plumbing systems.
June	Lighting and Acoustics - Dive into Lighting and Acoustic systems.
July	Building Materials & Assemblies - Explore material properties and selection.
August	Building Materials & Assemblies - Explore material properties and selection.

September	Detailing and Construction Documents - Study construction detailing and documentation standards.
October	No Study Group
November	Project Integration and Coordination - How architects integrate various systems, materials, and disciplines into construction documents and manage coordination challenges during construction.
December	Speaker Panel - Reinforce difficult technical concepts and final tips and final input on how all the systems affect each other

Volunteer

	<i>Want to be a speaker? Do you want to recommend someone as a speaker?</i>
	<i>Would your firm like to host a study session?</i>
	<i>Are there topics or questions you would like to have a study session cover?</i>
